SEEMAB ALI

AI APPLICATION DEVELOPER | FULL-STACK MERN & NEXT.JS | API & AI INTEGRATION

LAHORE, PAKISTAN | +92 339 5914110 | SEEMABALI@PROTON.ME | GITHUB | PORTFOLIO

Software Engineering graduate and AI Application Developer specializing in the MERN stack and Next.js 15. Experienced in engineering scalable enterprise web applications at 7 Kings Code. Proficient in bridging responsive frontend architectures (React.js, TypeScript) with robust backend services (Node.js, Express.js, Python, FastAPI). Skilled in seamless API and AI integrations, including OpenAI and Gemini API endpoints, to orchestrate intelligent software solutions, optimize RESTful APIs, and deliver high-performance code within Agile teams.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python.
- **Frontend Development:** React.js, Next.js 15 (App Router), Tailwind CSS, HTML5, CSS3, Responsive UI Development.
- **Backend Infrastructure:** Node.js, Express.js, FastAPI, MongoDB, Mongoose, RESTful API Development, JWT Authentication, Vector Databases (Qdrant, Pinecone).
- **AI & API Integration:** OpenAI API, LangChain, Prompt Engineering, Gemini API, Retrieval-Augmented Generation (RAG), AI Agent Orchestration, Function Calling (Tool Use).
- **CMS & Platforms:** Sitecore CMS, Component-Based Architecture, Dynamic Content Management.
- **DevOps & Tools:** Git, GitHub, Postman, Jira, Azure DevOps, LiveKit, TUS Protocol, Vercel, Docker, GitHub Actions (CI/CD).

PROFESSIONAL EXPERIENCE

Junior Frontend Developer | 7 Kings Code | Lahore, Pakistan
May 2026 – Sept 2026

- Engineered scalable and responsive frontend architectures for CWS Workwear, Hygiene, and Healthcare, a large-scale international enterprise web application.
- Built and optimized dynamic user interfaces utilizing Next.js, React.js, TypeScript, and Tailwind CSS, ensuring high cross-browser compatibility and Core Web Vitals performance.
- Collaborated within Agile development teams to seamlessly integrate RESTful APIs and backend services into the frontend ecosystem, aligning with modern application architecture standards.

Junior Web Developer | Total Soft Solutions | Lahore, Pakistan
Feb 2025 – May 2025

- Spearheaded frontend development for key client platforms, including AceBeauty and MBNCO Logistics (a regional enterprise transport platform).
- Constructed dynamic, type-safe UI components and orchestrated external backend API integrations utilizing React.js, TypeScript, and Tailwind CSS v4.
- Profiled and resolved frontend performance bottlenecks, driving a 10% improvement in team development turnaround time through enhanced code maintainability and modular architecture.

EDUCATION

Bachelor of Software Engineering | Virtual University of Pakistan | 2022 – 2026

- Cumulative GPA: 3.3/4.0 | Status: Graduated

Diploma of Associate Engineering (DAE) in Mechatronics | GCT Chakwal | 2018 – 2021

- 1st Position in Punjab Board of Technical Education | Final Score: 3228/3450

PROJECTS

CodeScry AI – AI Code Review Assistant | Next.js, TypeScript, Express.js, MongoDB, FastAPI, OpenAI API, LangChain, Tailwind CSS

- Architected an AI-powered code review application utilizing Next.js and FastAPI to autonomously evaluate JavaScript, React, and MERN stack codebases for logic errors and best-practice adherence.
- Engineered secure JWT authentication workflows, protected user dashboard routes, and real-time data analytics to manage review histories and system metrics efficiently.
- Integrated a scalable FastAPI microservice with LangChain and the OpenAI API to orchestrate AI evaluations, strictly enforcing structured JSON outputs for code scores, severity levels, and actionable learning recommendations.

Automated Timetable System (Final Year Project) | Next.js, Node.js, MongoDB, Tailwind CSS, REST APIs

- Engineered a role-based scheduling platform utilizing Next.js and Node.js to automate course allocation, manage faculty constraints, and generate conflict-free academic timetables.
- Architected secure authentication workflows and dynamic REST API logic tailored for specialized admin, teacher, and student dashboard environments.
- Directed the complete Software Development Life Cycle (SDLC), from initial database modeling in MongoDB to a successful final prototype defense.
